The graph displays the water level over a 24-hour period. The y-axis ranges from 5m to 20m. The x-axis shows time from 10:00 to 14:00. A blue line represents the water level, which fluctuates between approximately 6.5m and 11m. A green shaded area (5m to 10m) is labeled 'Warning Level'. A yellow shaded area (10m to 13m) is labeled 'Critical Level'. A red dashed line is at 16.5m. A tooltip at 10:00 PM shows 'Water level: 10.0m'.
